Processing

It is simple. Easy to use. Accurate.

1. The driver starts and ends the trip with the press of one button. He designates loaded or unloaded.
2. The driver simply drives his route and the FIMS unit, using GPS technology, knows when the truck crosses a state line and how many miles the unit travels in each state. The data is collected for retrieval.
3. The unit can upload the data on an ongoing basis via wireless communication or the data can be downloaded as desired.
4. The central database is the keeper of the mileage rates and calculations for each state and will automatically and accurately tabulate all the data into a government approved form.
5. The office staff or management can also open any trip log for a detailed look at the data. Review on their computer the entire trip history (including map trail).

Is your company spending too much time?

Take a look at the benefits of the Automated Fuel Tax Manager

For the Driver:

1. Time savings - save 15-30 min per day not writing trip information
2. More accurate - reduced manual mistakes (i.e. inverting numbers)
3. Increased safety - Keep focused on the road instead of writing numbers
4. All that is required - Press a button at the beginning and end of each trip. Enter fuel amounts when refueling
5. Eliminate costly fines from inaccurate or missing manual information

For the Office Staff:

1. More legible and accurate trip reports
2. Reduce manual review time by 10 minutes per report
3. Reduce manual calculating of data by 3 minutes per report
4. Reduce typing time of the reports 3 min per report
5. Review on their computer the entire trip history (including map trail)
6. Greatly reduced time spent on completing reports
7. Totally paperless trip logs
8. Tabulated to the quarterly IFTA and other State/County reports

For the Owner/Manager:

1. Knowing where their vehicles are in real time
2. Easy access to reroute trucks based on additional business requirements
3. Optimize the usage of your fleet, provide better safety for the drivers
4. Reduce non productive time spent by drivers and office staff
5. Realize true savings on your mobile assets

Collecting fuel and driver time data and reporting errors cost you more time and money?

Let Automated Fuel Tax Manager automate the generation of your quarterly fuel tax statement. From Data collection to fuel tax reporting to consumption tracking... we can do it FAST and Easy with our integrated solution. Let your people be more productive with less effort. And fewer mistakes!

*** Reduce data calculation time by up to 70%**

Tabulate your data for the final government form.

Let Automated Fuel Tax Manager save your operation time and money.

Sample:

Fleet of 40 trucks
1 full time Office staff
FIMS Fuel Tax Manager saves 20 minutes per day for each driver.
That is 4,000 min per week
SO, per year = 3,350 non productive hours per year.
FIMS gives you a to 6% savings of manual tasks

If your staff saved 15 min per report X 110 reports per month = 27.5 hours per week saved 40 hours worked - 27.5 hours saved = 68% savings in manual tasks

Let Automated Fuel Tax Program work for you and your people .
